

PAPI

Habille vos extérieurs

Edition 2026

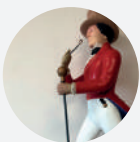

PAPI, a family tradition

1904

In l'Isle-Adam, North of Paris, Gilbert PAPI founded his first workshop, crafting promotional terracotta items and statuettes for Churches.

1950

The creation of Iconic advertising figures for brands such as Johnny Walker + Pierrot Gourmand brought PAPI to recognition in France and abroad.

1993

A new chapter began when the Ferey family acquired the company, launching it into urban plantation sector, with a complete range of flower & plant pots designed for balconies in public spaces.

2005

Launch of the emblematic "ROUND DECO POT" and expansion into ground-level planting solutions.

2010

Development of a unique recycling process ensuring products 100% recycled and recyclable.

2020

Implementation of this recycling system directly at client sites, closing the loop of sustainability.

HDPE rotomoulded

High Density Polyethylene

Our products are manufactured using rotational moulding, a specialized process that shapes HDPE by rotation, producing extremely durable and long-lasting products.

The raw material is pre-coloured at source, offering anti-UV stabilization. Going from three millimetres to eight millimetres, our products offer a superior strength and durability.

All products come with a 10-year warranty against corrosion, ensuring exceptional durability, even in demanding environments.

Each rotational moulding piece is hand-assembled and finished to meet PAPI's high quality standards with rigorous quality controls at every production stage.

100% RECYCLABLE AND/OR RECYCLED

As part of our commitment to environmental preservation, PAPI is continually advancing its recycling processes.

Since 2010, we are recycling 100% of raw material loss coming from the manufacturing process.

We also offer the opportunity to return end of life PAPI products, including pots, balcony boxes and planters which are then cleaned, cut, crushed and micronized enabling their reintegration into the production cycle.

All black-coloured items are made from this recycling loop, reinforcing our commitment to a sustainable production.

Each product thus becomes the raw material of tomorrow where every planter contributes to responsible manufacturing.

Together, we transform today's waste into tomorrow's solutions.

Vasques ATOLL, Finition Corten

Finition Corten :

Pot VOGUE pages 28-29

SPECIAL FINISH CORTEN EFFECT

Our Corten effect finish captures the aesthetic and tactile essence of genuine Corten steel, known for its natural patina and rust-like appearance, which evolves over time. Each hand-finished piece, with its shades and details, is unique.

This handcrafted technique, combined with HDPE, delivers a distinctive and timeless look along with exceptional durability. The unique character of each piece makes it even more precious, with subtle nuances and details that vary from one to another.

Colour : Taupe (G1519), Finition velvet

Finition velvet :

Pot LUNE pages 34-35

SPECIAL FINISH VELVET EFFECT

The aesthetic appearance and soft touch evoke the smoothness and finesse of a carefully crafted surface. Our Velvet effect finish is achieved through expert hand-sanding techniques, giving each product a unique texture and a refined, sophisticated look.

This handcrafted process combines elegance and strength, ensuring a premium, long-lasting result, especially applied to our HDPE.

OPTION AQUATIC PLANTING

Aquatic version :

Design as ornamental water features, our pots in aquatic version are produced without drainage holes to ensure perfect waterproofing. This option transforms each planter into a refreshing and peaceful oasis, ideal for water-lilies, aquatic plants, or even a complete natural ecosystem.

While the design remains unchanged, the function evolves. You can now combine water, depth and greenery, opening up a new poetic and soothing dimension in landscape design. Thanks to the robustness of HDPE, the structure maintains both stability and essential impermeability, ideal for outdoor and indoor environments.

The result is a unique aquatic landscape element, blending contemporary aesthetic with natural harmony.

* Available only for the ATOLL (P16) and RODEO (P30) ranges

TESTIMONIAL

Clémence TREMBLAIS,
Co-director of « AQUAMOINE »,
Specialised in aquatic plants

"You don't need a large garden to enjoy the beauty of water. A refined PAPI Mobilier Lowerin, adorned with a few aquatic plants, can bring life and tranquillity to any terrace. The secret lies in choosing the right varieties: a small water lily, some riverside grasses and a few oxygenating plants together create a harmonious, lasting ecosystem that stays balanced and elegant throughout all seasons."

HANDLING THE POTS

LIFTING SYSTEM

Our pots can be safely moved and repositioned whenever needed without risk of damage.

The lifting system with straps is compatible with all our products (except the Rodeo Range) and allows even the largest containers to be lifted, transported and installed without compromising their structural integrity or surface finish.

Scan the QR code to watch a demonstration video and learn how to use the lifting system correctly.

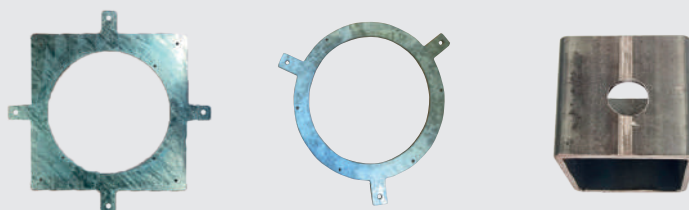

FIXING THE POTS

THE ANCHOR SYSTEM

To ensure maximum stability and safety, pots can be equipped with anti-tilt fixing systems, while maintaining the elegant design of the containers.

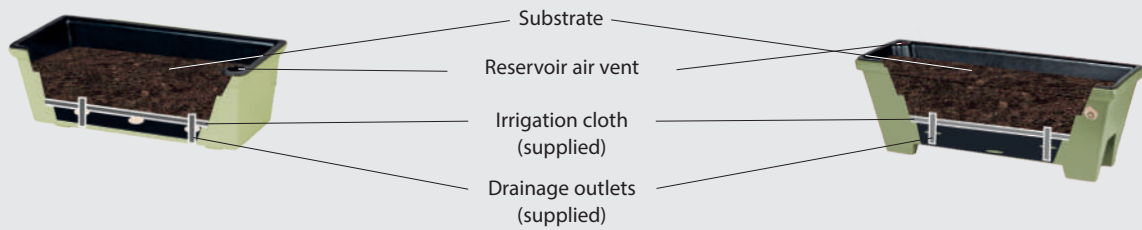

Find the pictogram with each compatible model on the catalogue.

TESTIMONIAL

Marie-Laure RAULINE,
Co-director of "JAVOY"
Specialized in climbing plants.

"We chose the MURANO planters to showcase our patented ICO removable mesh planting system. Their generous volume offers the perfect space for plant growth and provides a solid, reliable Lower for our innovation. Beyond functionality, their discreet and elegant design enhances the whole installation, allowing ICO and our climbing plants to take the spotlight."

KOSTO

Born from the fusion of a 1300 KG concrete core and a 100% recycled and recyclable HDPE shell, the KOSTO planter combines contemporary design and aesthetic appeal. It offers a defensive yet elegant solution that meets modern urban safety requirements while maintaining visual harmony within public spaces.

Technical specifications:

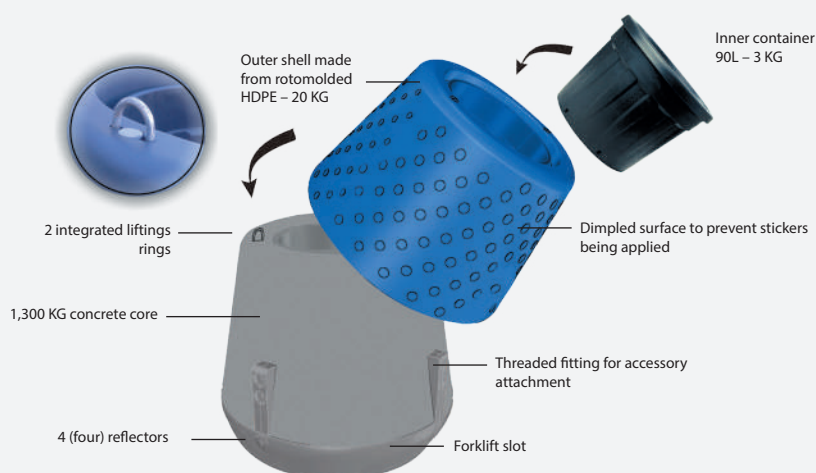

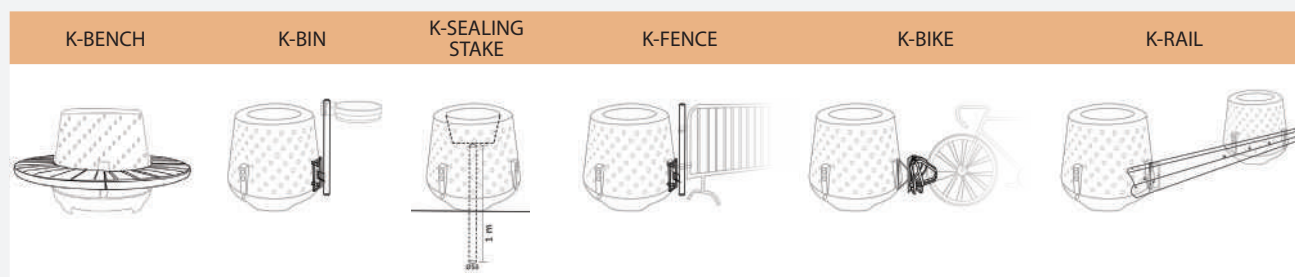

- Equipped with a 90 L planting basket, allowing you to combine safety of people and controlled access and planting within a single functional element.
- Outer shell available in 22 colours and customizable with six optional accessories upon order.
- Easily handling with a forklift or integrated lifting rings.

BALCONY BOX

Compact, versatile and design for outdoor living, the BALCONY BOX range transforms railings into functional and vibrant green spaces.

Available in three versions:

- Straddling model - placed directly over the railing
- Straight suspension - positioned over the guardrail
- Curved suspension - positioned over the guardrail

Technical specifications:

- Equipped with a removable drilled inner container and an irrigation cloth featuring two drainage outlets.
